

# CURRICULUM DEVELOPMENT 2019 & BEYOND

## Intent, Implementation and Impact

### 3) HAS IT STUCK?

You've been busy – but are efforts paying dividends? Take the time to regularly monitor, evaluate and review the curriculum to ensure all pupils are getting a good deal.

### 1) WHAT'S YOUR INTENTION?

This is all about ensuring your school has a clear and ambitious rationale for your school's curriculum. It's essential teachers and leaders begin to understand the importance of knowledge, progression and sequencing.

This is the time to think about equality of opportunity and what this means for your school.

### 2) MAKE IT A REALITY!

Now put theory into practice. Ensure staff and leaders understand their role, along with the importance of subject knowledge. This can be achieved through regular review, high quality CPD, robust quality assurance and a clear rationale for assessment across the school.
